

Customer Full Names Data

This dataset contains a list of full names.

In Power Query, you will split this column into separate 'First Name' and 'Last Name' columns.

Later, you can merge them back using different delimiters.

Full Name
John Smith
Mary Johnson
James Williams
Patricia Brown
Robert Jones
Linda Garcia
Michael Miller
Elizabeth Davis
William Rodriguez
Barbara Martinez
David Hernandez
Susan Lopez
Joseph Gonzalez
Jessica Wilson
Charles Anderson
Sarah Thomas
Thomas Taylor
Karen Moore
Christopher Jackson
Nancy White

Power Query Instructions:

1. Load this dataset into Power Query.
2. Select the 'Full Name' column.
3. Click 'Transform' -> 'Split Column' -> 'By Delimiter' (Choose Space).
4. Rename the new columns as 'First Name' and 'Last Name'.
5. To merge them back, select the two columns, click 'Transform' -> 'Merge Columns'.
6. Choose a delimiter (e.g., space, comma).
